intense delight of hundreds. His voice is remarkable for its clear, ringing quality, for the purity of its iones, for its fexibility and its volume. Biest with such a voice and the disposition to use it as he, in praising and persuading others to praise the Giver of all good things, he ought to be a happy man. With what fervorwhat depth of devotion—what pathos—he sang to his own organ accompaniment those beautiful songs in which the little ones take delight; and when, to vsry the entertainment, he sang a solo with a chorus by the whole sudiches, the effect was indescribable.—[Louisville Courier-Journal.]

This Stove is a first-class economizer in fuelIt differs materially from others in this respect.
The columns are larger. By means of a damper,
the heat is passed down the two front columns,
under the bottom, back up the two rear columns
and out of the pipe, which sets on the top of the
stove. By this arrangement you have the finess
radiator and economizer extant. All will admit
that it is desired that a heating stove should be
so arranged that a majority of the heat be thrown
out in front, instead of back. Call and see this
